Updates on Most Recent Local Activity: Week 21 (May 20 – May 26)

- Visits to a Marion County Emergency Department with Influenza-like Illness (ILI) symptoms have been similar to what we experience outside of flu season for the past 8 weeks. During Week 21 they made up only 0.52% of Marion County ED visits.
- There have been 25 influenza-associated deaths for Marion County residents this flu season.
- In Marion County hospitals' ED population, ILI was most common in the 0-4 age group. Among ED visits by 0-4 year olds, 2.69% was for ILI. ILI among ED visits by 5-17 year olds was next highest, at 0.59%.

Percent of ILI related ED Visits

Percent of ILI related ED Visits by Age Group

Note: ILI (Influenza-Like Illness) visit means that the patient reported fever with cough or sore throat, or used the word "flu" or "influenza" to describe either their symptoms or their reason for the ED (Emergency Department) visit.

Influenza Situation Report

2017-2018 Seasonal Influenza Week 20

(May 13 – May 19, 2018)

Local (Week 20)

- The percentage of ILI related ED visits was 0.47%.
- Children age 0-4 had the highest age-specific percent ILI (1.50%).

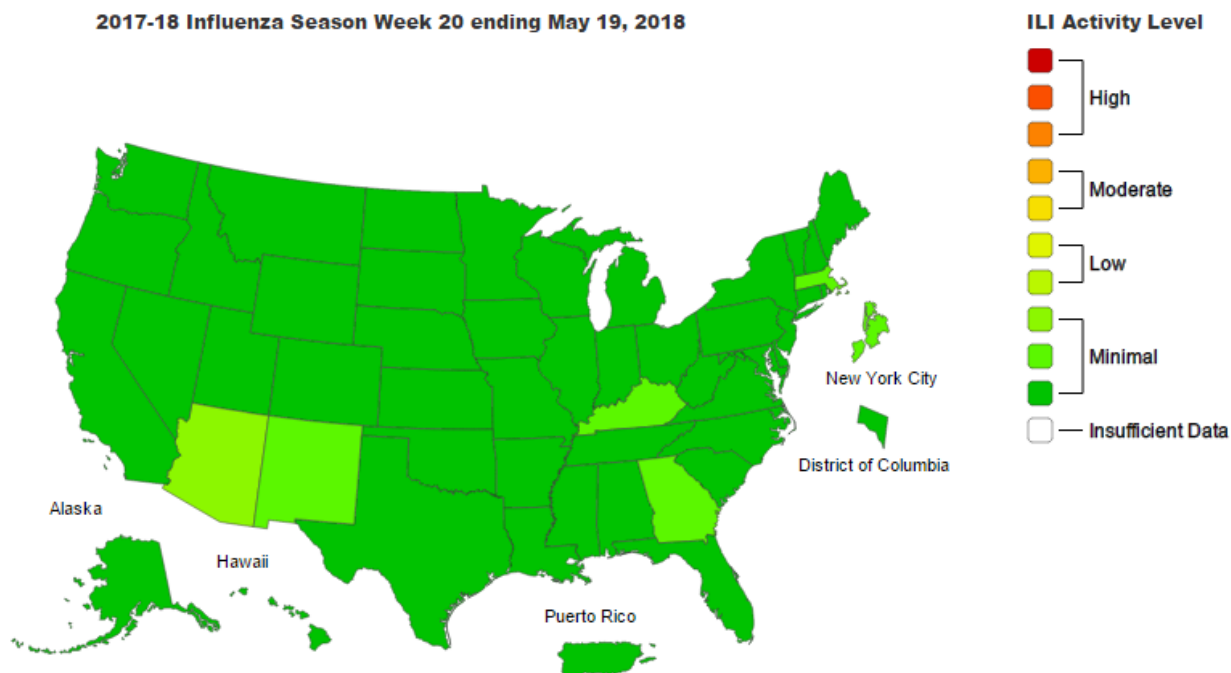

Indiana (Week 20)

<https://www.in.gov/isdh/files/Weekly%20Influenza%20Report-Week%2020-2017-2018.pdf>

- Indiana is experiencing sporadic and minimal ILI activity. For Week 20, ISDH reports 1.06% ILI at sentinel provider sites and 0.65% ILI ED visits. This is a decrease for sentinel sites and EDs.
- The total number of mortalities in Indiana this flu season is 335.
- Week 20 results for samples tested at the state lab no specimens' positive for Influenza.

National (Week 20)

<https://www.cdc.gov/flu/weekly/index.htm>

- During Week 20, influenza activity decreased in the United States, and the majority states were reporting minimal and sporadic influenza activity. In addition, during Week 20, 1.2% of outpatient visits reported through the U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet) were due to ILI. This was the same as Week 19.
- 169 influenza-associated pediatric deaths have been reported to CDC this flu season.
- The percent of respiratory specimens testing positive for influenza in clinical laboratories decreased. During Week 20, the numbers of positive specimens for influenza A (45.7%) was lower than influenza B (54.3%).

Note: ILI (Influenza-Like Illness) visit means that the patient reported fever with cough or sore throat, or used the word "flu" or "influenza" to describe either their symptoms or their reason for the ED (Emergency Department) visit.
