Updates on Most Recent Local Activity: Week 42 (October 11 – October 17)

- Visits to Marion County emergency departments with influenza-like illness (ILI) symptoms are similar to previous year and are below the 2% baseline. Visits with respiratory syncytial virus (RSV) for children 0-4 years old are lower than we normally see this time of the year.
 - RSV is a common respiratory virus that is the most common cause of bronchiolitis and pneumonia for children under 1 year of age in the U.S.¹.
- During Week 42, **1.11% of Marion County ED visits had ILI symptoms.**
- In Marion County hospitals' ED population, ILI was **most common in the 0 – 4 age group** (1.9%).

Percent of ILI related ED Visits
