Local (Week 17)

- The percentage of ILI related ED visits was 1.0%.
- Infants and toddlers, 00 - 04 years old, the highest age-specific percent ILI (4.3%).

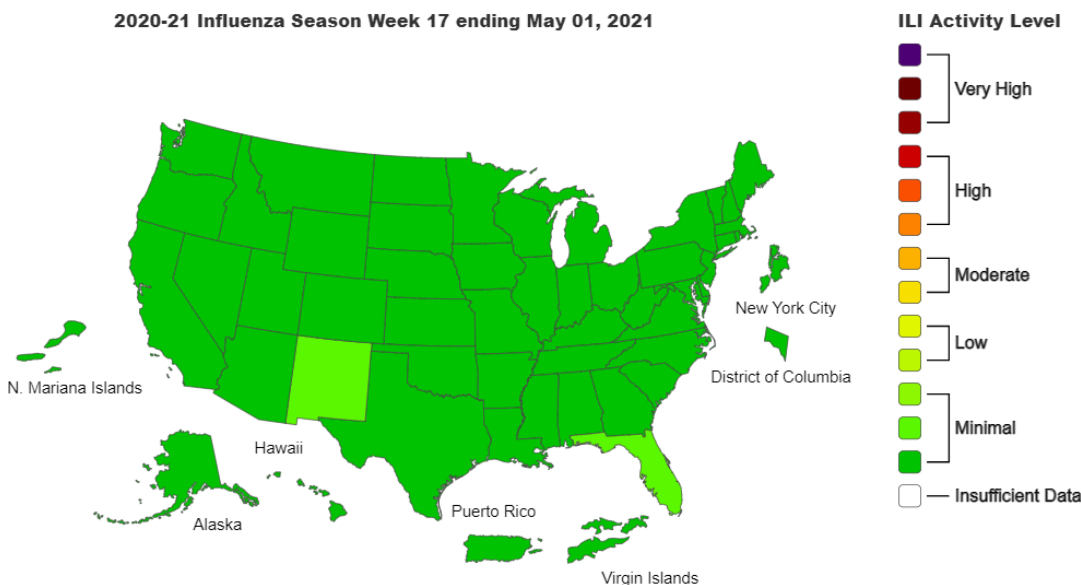

Indiana (Week 17)

<https://www.in.gov/isdh/files/Weekly%20Influenza%20Report-Week%2017-2020-2021.pdf>

- Indiana is experiencing **minimal ILI activity**.
- For Week 17, ISDH reported 1.0% ILI at sentinel provider sites and 0.9% ILI ED and urgent care visits.
- There have been 5 **influenza-associated deaths** this season.
- No specimens were tested positive at the IDOH Laboratory during Week 17.

National (Week 17)

<https://www.cdc.gov/flu/weekly/index.htm>

- **Influenza activity remains lower than usual for this time of year. Confirmed labs as reported by clinical and public health laboratories remains low.** All reporting jurisdictions had minimal influenza activity.
- **Outpatient visits due to ILI stayed at 1.1%** for the fourth week in the row, as reported through the U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet). It was the same as three previous weeks (Weeks 14-16).
- **One influenza-associated pediatric death** has been reported to CDC this flu season.
- During Week 17, there were **14 positive influenza tests sent to clinical laboratories (0.1% positive specimens)**. The percent positive was the same as Week 16 at 0.1%.
- During Week 17, **1 (<0.1%) of the specimens submitted was positive at public health laboratories**.
