Local (Week 14)

- The percentage of ILI related ED visits was 1.0%.
- Infants and toddlers, 00 - 04 years old, the highest age-specific percent ILI (3.6%).

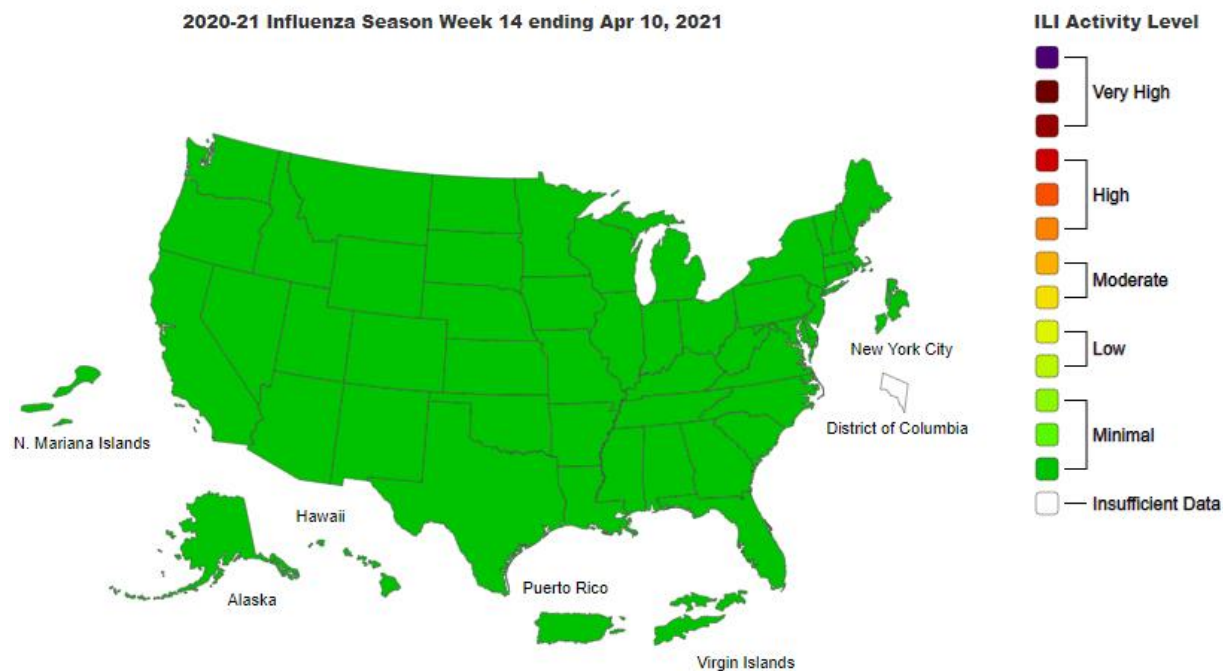

Indiana (Week 14)

<https://www.in.gov/isdh/22104.htm>

- Indiana is experiencing **minimal ILI activity**.
- For Week 14, ISDH reported 0.9% ILI at sentinel provider sites and 0.8% ILI ED and urgent care visits.
- There have been 5 **influenza-associated deaths** this season.
- No specimens tested positive at the IDOH Laboratory during Week 14.

National (Week 14)

<https://www.cdc.gov/flu/weekly/index.htm>

- **Influenza activity remains lower than usual for this time of year. Confirmed labs as reported by clinical and public health laboratories remains low.** The majority of jurisdictions had minimal influenza activity.
- **Outpatient visits due to ILI stayed at 1.1%**, as reported through the U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet). It was similar to the previous week (Week 13: 1.0%).
- **One influenza-associated pediatric death** has been reported to CDC this flu season.
- During Week 14, there were **15 positive influenza tests sent to clinical laboratories (0.1% positive specimens)**. The percent positive was the same as Week 13 at 0.1%.
- During Week 14, **0 (0%) of the specimens submitted was positive at public health laboratories**.
